DETAILED ACTION

Pending Claims

The pending claims in the instant application are 36-55. The independent claims are 36 and 45.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 36-55 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerstel et al. (U.S. Patent 3,964,482).

Gerstel et al. discloses a an applicator having a plurality of skin piercing microprotrusions, a head and a surface having any desirable shape since the body is molded or a laminate wherein the structure has the same structural limitations of the instant claimed invention (see Abstract, Fig. 1-7 and col. 9, line 42 to col. 16, line 3). A change in shape without a change in function does not impart patentability.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 36-55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerstel et al.

Gerstel et al. discloses a an applicator having a plurality of skin piercing microprotrusions, a head and a surface wherein the structure has the same structural limitations of the instant claimed invention (see Abstract, Fig. 1-7 and col. 9, line 42 to col. 16, line 3). Gerstel et al. does not disclose that the application has a shape other than square.

Gerstel et al. does disclose that the application is molded or laminated therefore having any desirable shape since the body is molded or a laminate (see col. 9, line 42 to col. 10, line 13). Therefore, it would obvious to one of ordinary skill in the art to use the combined teachings of Gerstel et al. to make an application having any shape including that of the instant claimed invention since the applicator is molded or a

laminate in the absence of a factual showing to the contrary or a showing of unexpected results.
